

LEAPS™

Lower Extremity Armor Protection System

Specially designed to protect the femoral arteries and veins from potentially lethal leg related injuries, Point Blank's Lower Extremity Armor Protection System (LEAPS)

FRONT

BACK

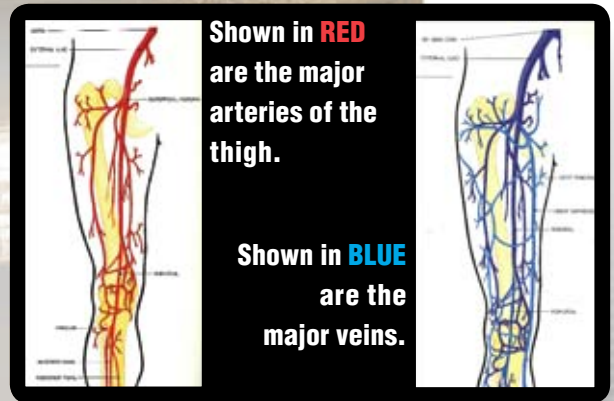

provides exceptionally lightweight ballistic protection with an unparalleled level of comfort, flexibility and mobility.

Features Features Features Features Features

Features:

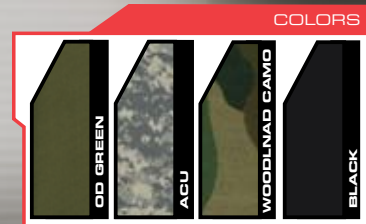

- » Available with high-performance NIJ Level IIIA ballistic system that is rigorously tested to meet or exceed the Military V50 Specifications in accordance with MIL-STD-662F for 2gr, 4gr, 16gr and 64gr RCC fragmentation.
- » Load bearing MOLLE webbing offers easy mounting of holsters, spare magazines, grenades, stun munitions and other combat equipment.
- » Trauma insert plate pocket allows insertion of 5" x 8" Special Threats Plate (STP) for an even greater level of protection.
- » Ultra-stretch strapping system with dual VELCRO® Fasteners provides 2-point adjustability.
- » LEAPS attaches to the belt in seconds.
- » Extensive ballistic coverage protects the hip and front/rear thigh region against fragmentation to lower body and thermal burns from operations in hazardous environments.
- » Contoured shape allows wearer to run, climb, shift from prone to standing positions and maneuver easily with total comfort.
- » Constructed of extra durable 500 denier Cordura®.

Shown in **RED** are the major arteries of the thigh.

Shown in **BLUE** are the major veins.

Injury to the femoral arteries and veins of the abdomen and thigh from high energy projectiles carries a high risk of injury and/or death from shock and blood loss. Lower extremity armor was created to protect these vital areas while allowing the operator to maintain mobility.
