Point Blank
BODY ARMOR

Wear It For **LIFE**

More than a **Knife,**
It's a **Tool**
You'll Own for **Life.**

Point Blank Body Armor has incorporated both advanced functionality and safety into its top-of-the-line, knife collection. Built within a framework of hardened stainless steel, these smooth, one-handed folding and fixed knives are engineered for a broad range of duty operations.

G10 Handle – Ergonomically designed textured handle provides superior grip and outstanding hand protection. The folders include a left and right access button to assist in opening and a safety mechanism that locks the blade in position. G-10 is an extremely durable composition of fiberglass layers that are bonded together, forming a hard-wearing structure that is impervious to climate changes and moisture. Handle includes a safety.

Sheath – Made of 500 denier ballistic nylon, it's the same resilient material used in Point Blank Body Armor tactical outer shells - durable, long-lasting and easy to maintain.

N690 Blade – Constructed of N690 stainless steel, this heavy-duty, wear resistant blade delivers the best combination of edge retention, flexibility and hardness. Each blade demonstrates extraordinary piercing power, tip strength, and shock absorbing ability.

Removable Belt/Pocket Clip – Detachable clip supports all possible carry options and helps guarantee a positive draw and blade safety.
